

Orchid International Plant Tour & ERP System Seminar

Date: Thursday, January 22, 2009

Schedule: 6:00pm Plant Tour & Seminar. 7:00pm Networking Dinner

Location: Orchid International, 94 Belinda Parkway, Mt. Juliet, TN 37122

Join the Tennessee District of the Precision Metalforming Association for a plant tour of Orchid International and an informative seminar on the benefits of an enterprise resource planning (ERP) system.

Orchid International is proud to be a world-class supplier of metal stampings, assemblies, lamination stampings and die casting products and services to industry leaders in the automotive, appliance, lighting, electric motor, lawn and garden, and countless other industries throughout North America.

From its early history as a successful stamping and automated equipment supplier, Orchid International has rapidly grown to become a large, highly sophisticated and technically superior manufacturer of metal stampings, lamination stampings and complete assemblies to the North American market.

Orchid will show attendees how it has employed an ERP system for EDI order entry and CUMS management, MRP and scheduling, production reporting and labor efficiency, weigh-scale process validation, inventory scanning and tracking, bill of lading creation and scanning validation, scrap tracking and reporting, and auto reporting each day. This system has been a crucial link in Orchid's supply chain management and has helped the company manage business decisions and improve its bottom line.

Make sure to sign up early for this informative tour and seminar!

Cost: \$25 per member; \$35 per nonmember
Registration Deadline: January 20, 2009
